Company Announcement.

Kheeran makes Alberta Fast Growth 50 list 2016.

Primed for another great year.

Edmonton, AB (January 5, 2016) – Kheeran Inspection Services Inc. is proud to announce that it has been named to the Alberta Fast Growth 50 list for 2016. As providers of Inspection Services, we have spent the last 6 years devoting ourselves to providing exceptional service to our clients. Through this devotion and hard work, as well as exceptional knowledge of our staff, we have been able to assume a fast growth trajectory in recent years.

This being said, our work is still not done. In 2015 we were able to expand Kheeran to 2 new locations and begin to offer some additional services. Currently, Kheeran has 6 offices worldwide which include; in Canada, Edmonton, Calgary, Vancouver and Fort McMurray, and internationally in Houston, USA and in Surrey, UK. We have plans open up 4 new offices worldwide in 2016, with focus on Europe and Asia regions.

In the past year, we have put our major focus into 4 main services departments: **Project QA/QC Inspection, Vendor Inspection, Non-Destruction Testing and Documentation Support.** These services are provided to our clients through our 68 fulltime employees and worldwide contractor database. All of our personnel and clients are further supported by our various technical support staff and trainers working in our offices.

In 2015, we were presented with many questions about our business; however, no question was mentioned more then: Are your employee inspectors truly fulltime employees? The answer to this question is **Yes.** Our core employees are hired on a fulltime basis, and even when there is no projects, our employees come to our offices, sit down with technical staff, and work on personal development. The result, is that our clients get some of the most knowledgeable individuals in the industry and almost no turnover on support staff placed.

The outlook for the oil and gas industry is not without talk of downturn through 2016. Still this is the time for everyone, including us, to work harder to provide clients with a better service. We want to continue to support current and new clients manage their quality control needs; however, in 2016 we are going to work even harder, to ensure our clients are able to impress and get more work from their clients.

In addition, Kheeran is making sure it is fully certified to be pre-qualified with any client. This past year we added becoming a **National Board Authorized Inspection Agency** to our **ISO 9001:2008** and **CWB 178.1** certifications. In 2016 we will continue to develop and constantly improve our company Quality, Health and Safety and Orientation Programs.

We would like to thank all of our clients, employees, contractors and mentors for all of the support they have offered us. We look forward to forging new, and continuing to build on existing relationships throughout the industry in 2016 and beyond.
